Dear FCC Rep., I do a great deal of traveling and pay for the XM satellite service. It is unfair and disgusting to me that NAB can try to block a service provided by one of their competitors. I use these services for weather and traffic in areas I am heading into, many times in areas that I can not even receive standard broadcast signals. I think it would be a shame if NAB would be allowed to block a service in what is suppose to be a open market system.

Robert Miller.
